Highway 600 unable to view contacts using an iOS device

Pure Support - UK - 2018-03-19 - in Highway 400/600

If you are unable to view your contacts go into Bluetooth settings, tap the cog next to Highway here you will see 'Sync contacts' you need to manually enable this and make sure sub-options to allow iOS to access 'Phone recents' and 'All contacts' are ticked. You should now see your contacts.
