Changing channels in the network Bayern (Excluding UK Customers)

Pure Support - UK - 2015-12-11 - in DAB Specific

2015 will be further improvement in Bavaria the receivability of Digital Radio. For this, a gradual conversion of the channel 12D in the state-wide network of BDR is imperative. The date on the channel 12D (229.072 MHz) broadcast digital radio programs * will be handled the channel 10D (215.072 MHz) emitted. Thus an increase of the transmission power and hence an improvement in the signal quality is possible.

The technical migration begins on 24 February at the transmission location Augsburg / hotel tower and ends on May 12, 2015 at the transmission location Ochsenkopf in the Fichtelgebirge. The work is carried out in fixed steps on all 26 transmitter sites. Which sites are in what time frame converted learn in the table below. The channel change is usually done on the first day mentioned. Interruptions of the program, it can also come the next day.

IMPORTANT: When this commences an auto tune must be performed

* Digital radio programs: Absolutely HOT, Antenne Bayern, Bayern 1 Mainfranken, Bavaria 1 Central and Upper Franconia, Bavaria 2 North, B5 plus, Cult Radio, Radio Galaxy, Rock Antenne will be affected.
