'?' icon being seen on internet radio station listings

Pure Support - UK - 2019-02-23 - in Internet Radios and Pure Connect / The Lounge

A question mark placed next to any station listed in your scrolling list of stations denotes an 'intermittent' stream-status. This means that the radio stream has been tested by the Pure Connect service but the stream is now unavailable. Unavailable streams are normally attributed to the radio station stream temporarily stopping broadcast, or in more severe cases that the stream has stopped entirely.

In situations where the station has stopped streaming permanently the stream will be removed from the radio list - normally within 48 to 72 hrs.
