Pure Connect iOS App update 1

Pure Support - UK - 2018-03-12 - in [Apple\ Android Pure Connect App](#)

This latest release allows streaming via Bluetooth Caskeid. If you have already connected your Jongsos to your network, when you open the App you will see all your available speakers. This release allows you to connect a Jongo using Bluetooth and stream audio from your favorite audio app. Any Jongsos grouped within the app will play the audio, allowing you to control individual and group volume.

Stereo pairing is also available allowing you to combine two Jongsos into a left/right pair.

The next release will add radio content and the ability to stream your local music using Wi-Fi
