Sussex local DAB re-tune and coverage extension. Update to take place 9th December 2015

Pure Support - UK - 2020-12-03 - in DAB Specific

The Sussex DAB multiplex will be changing frequency overnight on Tuesday 8th December 2015. This is to allow the addition of three new transmitters: Crawley (from Little Prestwood Farm transmitter), Heathfield and Truleigh Hill.

This frequency change won't affect people who are listening on FM, MW, online or via digital television. This is a DAB frequency change only.

This frequency change will take place at **22:00 on Tuesday 8th of December 2015** and be available again **0600 on Wednesday December 2015** affecting **BBC Sussex, Capital, Gaydio, Gold, Heart Sussex, heat radio, KISSTORY, Pop Up Radio, Smile Sussex and Smooth Sussex.**

During this time DAB listeners will not be able to receive these stations.

If you have an alarm set to one of the affected stations you will need to use a different alarm system to wake up on Wednesday 9th December. The old frequency will be silent so you won't wake up to the radio playing.

To continue listening to these stations after 0600 on Wednesday you will need to perform an auto tune on your radio.

To retune your Pure DAB radio please refer to your product manual that can be found [here](#)

For more general retuning instructions these can be found [here](#)
